## PRODUCT INFORMATION

### SQUARE ARM OVERHEAD LEAD ACRYLIC MOBILE BARRIER WITH TORSO CUTOUT

The Square Arm Overhead Lead Acrylic Mobile Barrier With Torso Cutout is a radiation barrier shield with 45 degrees of rotation. Its torso cut-out helps fit most patients and, thanks to its offset design, it can be easily placed anywhere around the patient to provide protection during examination. Featuring a lead acrylic window of 0.50mm Pb equivalence protection, this barrier shield meets industry standards for medical x-ray protection. It also features four hospital grade casters with brakes, to provide better mobility. In addition, its square arm is constructed from powder coated alloy, which makes it resistant to corrosion.

## SPECIFICATION

**WINDOW SIZE: 32" x 24"**

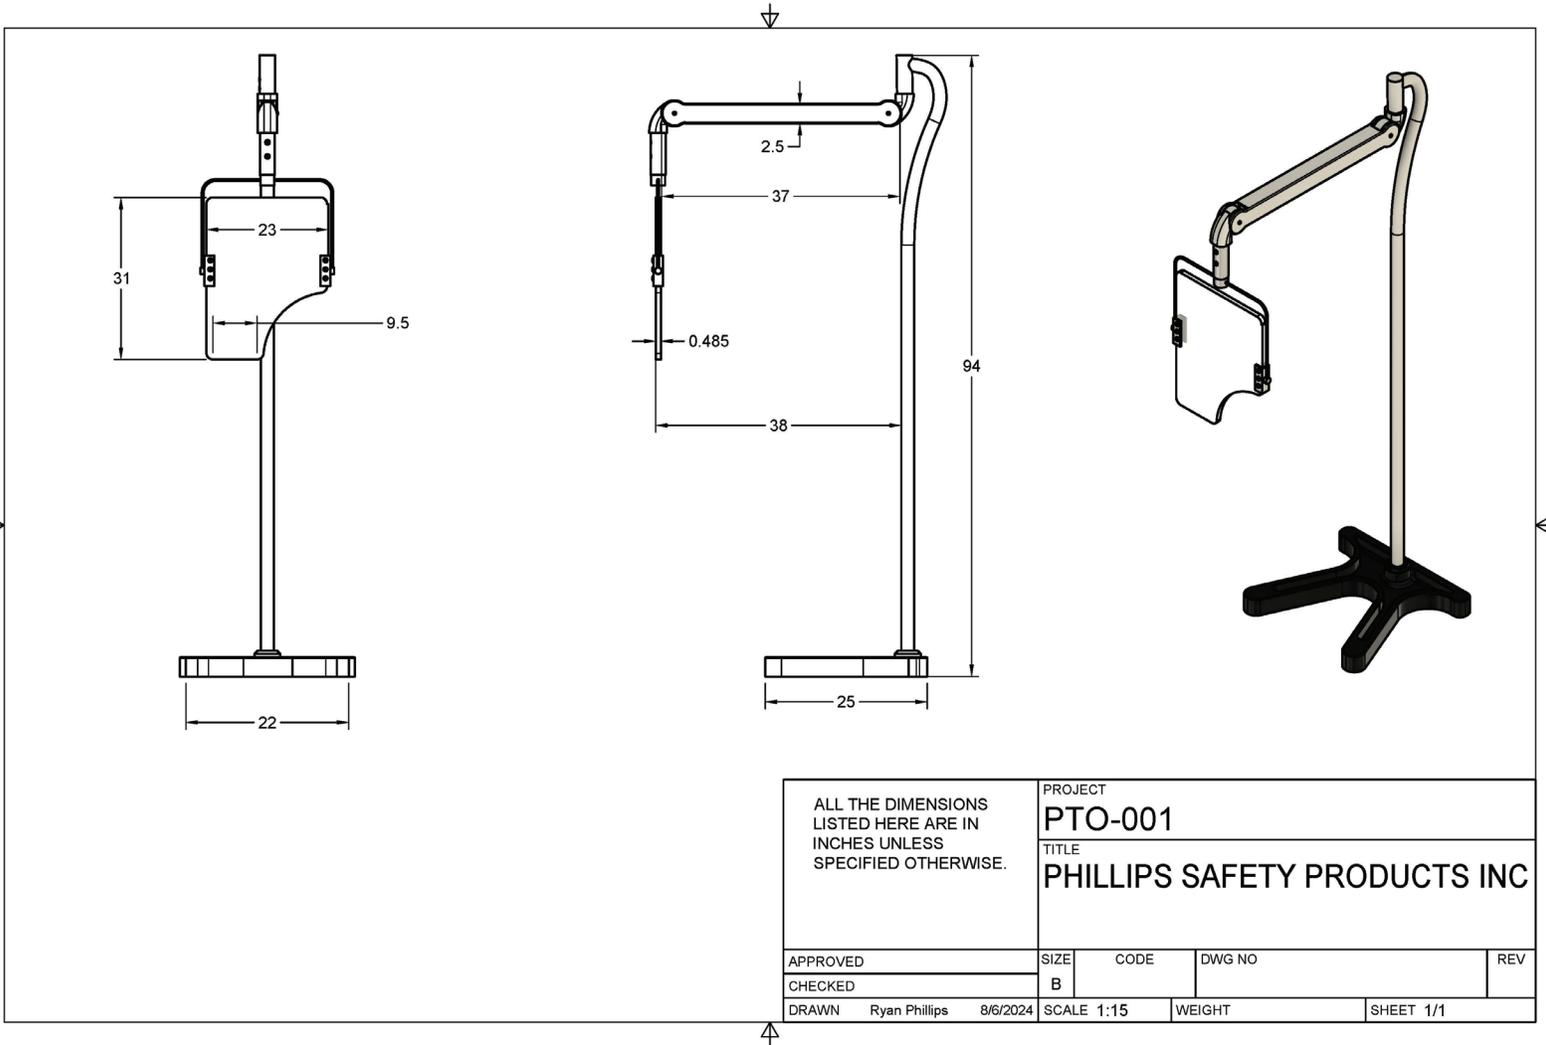

**Protection Level: 0.50 mm Pb LE**

**MATERIAL: Metal**

**FEATURES: Four grade casters with brakes**
