UVC CLEANING LIGHT GLASSES

UVC Cleaning Light Glasses are an essential tool for individuals who work in the sanitation industry or for those who use UVC cleaning lamps regularly. By providing a barrier between your eyes and the UVC light, these glasses can protect your eyesight and prevent eye damage. With their orange UVC protective filter, individuals can rest easy knowing that they are taking the necessary precautions to keep their eyes safe from harmful UVC rays.

While UVC cleaning light glasses can provide significant protection against UVC light, it is still essential to follow appropriate safety protocols when using UVC cleaning lamps, such as wearing protective clothing and ensuring that the area being sanitized is properly ventilated. By combining the use of UVC cleaning light glasses with proper safety measures, individuals can minimize the risk of harm caused by UVC cleaning lights and ensure that they are taking all necessary precautions to protect their eyes and overall health.

CATEGORY INFORMATION
UVC CLEANING LIGHT GLASSES

Phillips Safety's UVC Cleaning Light Glasses are specially designed to safeguard your eyes from dangerous UVC cleaning lights. UVC cleaning lamps have a wavelength range of 250 to 265 nm, which can cause harm to your eyes depending on the type of lamp used, whether it is mercury or LED. With Phillips Safety's UVC protective filter, 99.99% of these harmful UVC rays in the 250-265 nm range are blocked, ensuring the protection of your eyes. Additionally, all of our UVC cleaning light frames comply with ANSI Z87 safety standards.
