## PRODUCT INFORMATION

### PREGNANCY MATERNITY PANEL LEAD APRON PREMIUM LEAD FREE

The Lead Free Pregnancy Maternity Panel Premium Lead Apron is a highly effective, adjustable half lead apron designed to significantly reduce radiation exposure. This specialized pregnancy lead apron is a separate maternity panel that covers the belly, ensuring protection for critical areas. The Velcro band allows for easy adjustment around the waist, providing comfort and ample room for expansion during pregnancy.

20% lighter than our Economy Lead Free models, this apron enhances comfort and wearability. It features a non-lead bi-layer construction, and is available in a one size fits all. The apron offers 0.50mm Pb lead equivalency, using a non-lead core material. Plus, this lightweight apron is non-hazardous, 100% recyclable, and easy to dispose of. Note that in most states, you are required to have 1.00mm Pb lead equivalency to cover the critical area, which is accomplished by adding this maternity panel under the standard apron.

Furthermore, the core material complies with ASTM F3094-14 testing standards, ensuring reliability and safety. It also comes in four outer materials: Nylon, Ripstop, Polytron, or PVC EasyClean. In addition, the apron is available in various colors, all featuring black binding.

# RIPSTOP

Ripstop is a woven fabric that utilizes a reinforcing technique to enhance its resistance to tearing and ripping.

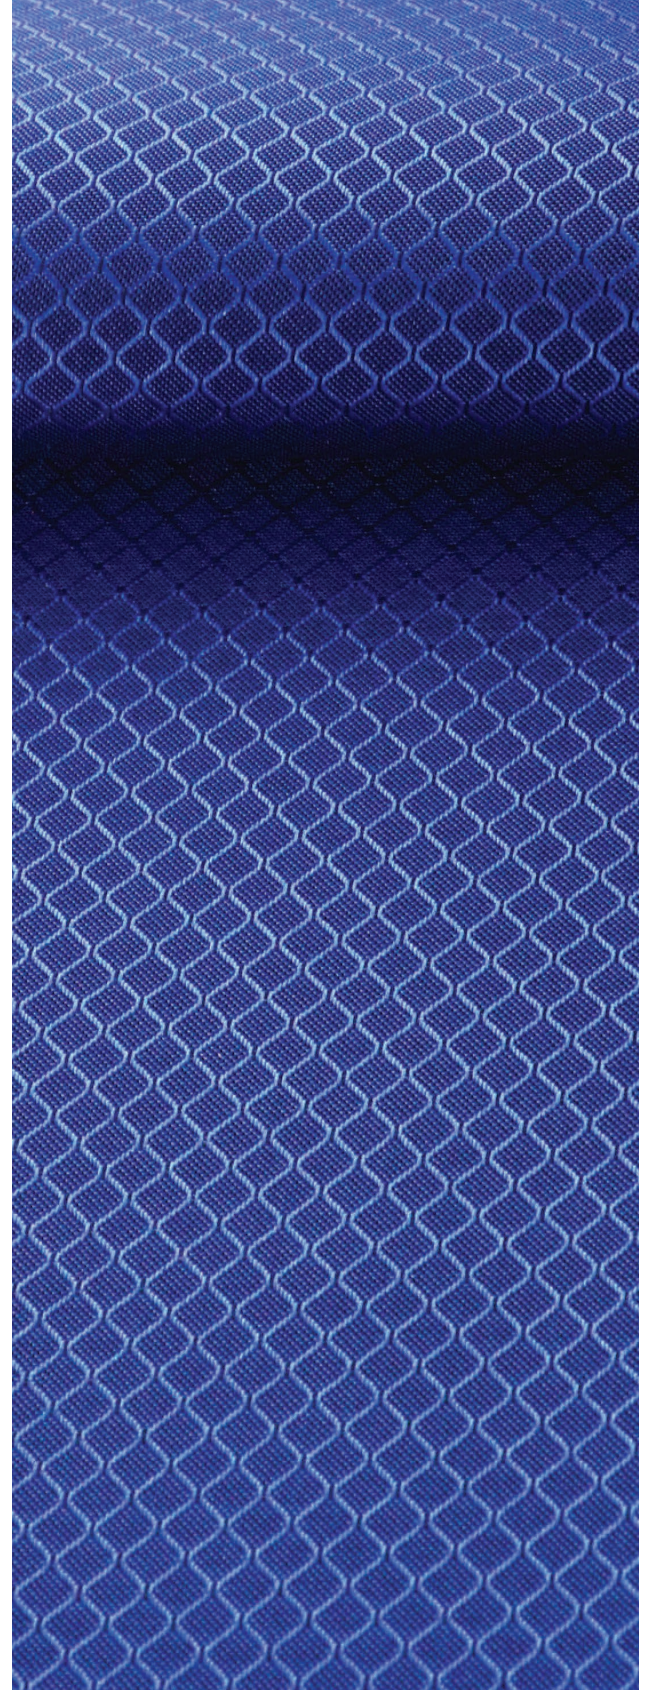

Commonly made from nylon, this lightweight material features interwoven reinforcement threads arranged in a crosshatch pattern, giving it a distinctive diamond-like appearance.

# POLYTRON

Polytron is a smooth, soft-touch fabric made in the U.S. Its flexible and comfortable qualities come from the polypropylene it's made of.

This lightweight material is inherently stain-resistant, free of PFC chemicals, and can be cleaned with bleach.
