LEAD BLANKETS

In environments where radiation exposure is a concern, ensuring maximum protection is essential. Phillips Safety Lead Blankets are expertly designed to provide reliable shielding for both personnel and equipment, offering an effective solution for a variety of radiation-prone settings. Whether used in medical, industrial, or nuclear applications, these blankets deliver robust protection where it matters most, helping to create safer workplaces and operational efficiency.

Crafted from high-density lead, our blankets are engineered to block harmful radiation effectively, creating a dependable barrier for enhanced safety. Their durable construction ensures long-lasting performance, even in the most demanding environments, making them a trusted choice for professionals across industries. Flexible and adaptable, these blankets can be easily positioned to shield specific areas, offering versatility in their applications. From protecting sensitive equipment to shielding
